

IBM

ThinkPad 700T

Use it wherever you think best

Portable pen-based power

Penstrokes instead of keystrokes

The IBM ThinkPad™ 700T pen-based computer brings the power of portable computing to professionals and mobile personnel who work away from an office environment.

Now appraisers, drivers, inspectors, marketers, medical and military staff, salespeople and others can take advantage of one of the most important business tools in the world today. And the ThinkPad 700T makes it possible for you to take advantage of computing without having to learn how to use a computer.

Setting the standard in pen-based computing

Imagine having a notebook with a screen that you write on – one that can recognize your handwriting and record your notations. *PC Week* called the IBM ThinkPad 700T "the cream of the crop." Part of the reason is the unique PenPoint® pen-centric operating system. It's an intuitive system that learns and recognizes your handwriting and can convert it to data. You use it like an ordinary notepad – take notes, jot down your thoughts, go from one page to another, change applications, and do it all without special knowledge about applications, files or directories. That's what makes the ThinkPad 700T so easy to use.

An easy-to-use pen-based computer

The ThinkPad 700T's backlit transfective display was designed to be readable in any environment – indoors or out. Its SSF (Solid State File) technology is more durable and provides better performance

than a hard drive. When you write with the pen it feels just as natural as writing on paper, and it digitizes so quickly that penstrokes appear almost immediately. The ThinkPad 700T can be used while it's in its carrying case and also comes with a built-in data/fax modem that lets you make the data connections you need from wherever you are. It's compact, rugged, durable, easy to hold, easy to use, and packed with functionality.

World-class service and support

The ThinkPad 700T comes with superb protection from IBM, which includes a one-year carry-in warranty (or optional on-site repair service) and assistance around the clock. IBM has the largest network of service providers in the world. And we can provide systems integration and application development expertise – IBM can help you develop a pen-based application through the PenAssist Developers Program. All of which adds up to make the ThinkPad 700T as productive as possible for your business.

Feature	Benefit
Pen-based computing	• Frees users from the keyboard, bringing the power of computing to workers and professionals on the move
Rugged portability	• Lets the ThinkPad 700T take the rigors of extensive handling, knocking and even inclement weather
Backlit display	• Has easy-to-read transfective display—suitable for any environment, indoors or out
Etched glass	• Helps the pen (digitizer) closely resemble the feel of a pen on paper
IBM PenPoint Operating System	• Helps you organize as you write with easy-to-use Notebook User Interface • Employs familiar penstrokes or gestures that execute commands like Delete, Move, Open and Select
Electronic ink	• Allows onscreen writing and drawing • Lets you save your work as is, or have it automatically translated to typed text and computer-rendered graphics
Handwriting recognition	• Translates handwriting accurately into typed text while you're writing
SSF technology	• Is more durable, smaller and lighter than hard drives, and is also removable
Built-in data/fax modem	• Enables communication and exchange of data with base office or clients from any telephone

Standard carrying case (included with 700T)

External diskette drive

Two-slot battery charger

Options

		Part number
Storage	External 3.5" 1.44/2.88MB Diskette Drive	6451156
Power	NiCd battery packs	6451141
	Two-slot battery charger	6451140
	Car battery adapter	6451168
Other features	10MB Solid State File cards	6451144
	8MB DRAM card	6451167
	Pen with battery	6451142
	Deluxe carrying case	79F0981

IBM ThinkPad 700T at a glance

Machine number	2521-001, 2521-002
Microprocessor	i386™ SX
Clock speed	20 MHz
Memory (RAM) (standard)	4MB or 8MB
Communications	Data/fax modem 2400/9600 bps
Integrated display	10" monochrome STN LCD backlit transreflective VGA (640 x 480); etched glass
Digitizer (pen)	Untethered electromagnetic
Ports	Serial, parallel, external FDD, keyboard, RJ-11
Internal storage (standard)	Two 10MB Solid State File cards
Power supply	NiCd battery (up to 3 hours of battery life); AC adapter
Operating systems	IBM PenPoint version 1.01
Size	Approximately 1.6"H x 12.4"W x 9.4"D
HelpWare™	Includes one-year limited warranty with carry-in service (or optional onsite repair service); setup, usage and service assistance 24 hours/7 days a week at no charge during warranty—via phone 800-772-2227, TDD/ASCII 800-426-4238, fax 800-426-3395, or bulletin board 404-835-6600; self-maintainer program; 30-day quibble-free money-back guarantee; for HelpWare in Canada, phone 800-465-7999
